

Quest Geo

All you need to know

1. You can register for your chosen event(s) via www.questadventureseries.com
2. Participants will receive a confirmation email with general details once registered and 3 days before event participants will receive an email containing:
 - a. Link to the Adventure Lab app.
The app will have details of the first start check point.
 - b. Map of full specific route PDF.
 - c. Info required for the event and guidelines.
3. Each participant should bring a bike lock, power bank phone charger if required and enough food and water for 2-4 hour adventure. There will be no water points provided on the route, no toilets, no directional signs, no marshals, it is a fully self-supported event.

Participants will start their event when they open the app at their first location on event day.

4. The app will have a written description as to how to locate the first check point which is the start point. The app will have a digital GPS map with the participant's location and the location of the next check point. Participants are asked to follow this map to get around the course.
5. Each check point has a sign securely fixed. The number code on this sign needs to be entered on into the app by participants to unlock that point, start their time, and give participants the information to proceed to the next check point and so on until all check points have been recorded.
6. It is a sequential process – the 2nd check point is not available until the 1st check point is found.
7. Participants will not be able to enter the check point code until they are within 20m of the check point. Participants are asked not to physically touch the cards at the checkpoints, and to respect social distancing and practice good coughing etiquette always.
8. You can follow the day's events on our social media channels, tag us in your pics and use #QuestGeo
9. Have an amazing adventure.
